Professional Summary

IT graduate with practical experience building web and mobile applications, supporting users, and deploying software projects. Experienced in developing systems for financial management, online marketplaces, secure file storage, and business operations. Comfortable working across application development, databases, APIs, authentication, cloud services, and technical support. I also provide web development and IT services to clients through Nivlek Solutions.

Experience

02/05/2025 –
02/08/2025

Chinga Tea Factory Company Ltd

IT Intern

- Supported staff with day-to-day use of SAP and other internal systems.
- Used POS scanners and field data collection tools to process tea leaf deliveries from farmers.
- Assisted farmers with loan applications and disbursements through the GreenFedha platform.
- Helped farmers and their successors access insurance services through the Majani Insurance system.
- Served at the customer service desk, responding to enquiries and helping resolve account-related issues.

Education

2022 – 2026
Embu

Bachelor of Science in Information Technology

University of Embu

Focus areas: software development, mobile application development, network security, databases, and data structures and algorithms.

Technical Skills

Programming

Python, JavaScript, TypeScript, Java, Dart, SQL

Cloud & Deployment

AWS, Supabase, Netlify, Cloudinary, Nginx, PM2

Mobile Development

Flutter, Android

Web Development

React, Next.js, Node.js, Express, Django

Development Tools

Git, GitHub, VS Code, Android Studio

APIs & Backend

REST APIs, Prisma, Authentication, Socket.IO 🔗

Databases

PostgreSQL, MySQL, MongoDB

Security

Application authentication, encryption, mobile security

Certifications & Training

Full-Stack Web Development Certificate - Power Learn Project (PLP) | 2025

Training in Python, JavaScript,
SQL, MongoDB and full-stack
web development.

Full Stack Web Development - eMobilis Technology Training Institute

Python Backend

Featured Project

AQUAMY

Community Savings Group Management System
Full-Stack Web Application

- Built a web-based management system for a Kenyan community savings group to manage members, contributions, loans, meetings, fines, shares, and financial records.
- Integrated M-Pesa payments for contributions, loan repayments, fines, and share purchases.
- Developed different levels of access for administrators, committee members, and ordinary members.
- Added email verification, password reset, registration approval, and application status management to improve account security and control membership access.
- Built financial records and member summaries to make information easier to track and manage.

Technologies: Next.js, TypeScript, PostgreSQL, Prisma, M-Pesa Daraja API
