

Kariuki Kelvin Wachira

Early-Career IT Professional | Full-Stack / Mobile Project Builder | Technical Support

Nyeri, Kenya | kelvinkariuki.dev@gmail.com | 0717328354

Portfolio: <https://myportofolio-kelvin.netlify.app/>

PROFESSIONAL SUMMARY

Information Technology enthusiast from the University of Embu and a Power Learn Project (PLP) graduate with practical experience in full-stack web development, mobile application development, IT support, and cloud deployment. Skilled in building and debugging software solutions while leveraging AI tools and technical documentation to deliver projects efficiently. Passionate about mobile security, end-to-end encryption, real-time systems, and practical problem-solving. Active member of the Google Developer Group (GDG) at the University of Embu and also offer web development and technical support to local clients through Nivlek Solutions.

EXPERIENCE

IT Intern - Chinga Tea Factory Company Ltd 2 May 2025 – 2 August 2025

- Worked with the ERP system (SAP) to support core business and internal data management tasks.
- Used POS scanners and field data collection tools to process tea leaf deliveries from farmers.
- Helped process farmer loan applications and disbursements through the GreenFedha platform.
- Assisted in issuing insurance covers to farmers and their successors using the Majani Insurance system.
- Served at the customer care desk, answering farmer questions and helping resolve account issues.

EDUCATION

BSc. Information Technology - University of Embu 2022–2026

Focus areas: Network Security, Mobile Development, Data Structures & Algorithms

Kenya Certificate of Secondary Education (KCSE) - Gathera Secondary School 2018–2021

Kenya Certificate of Primary Education (KCPE) - Muirungi Primary School 2010–2017

CERTIFICATIONS & TRAINING

Full-Stack Web Development Certificate - Power Learn Project (PLP), 2025

Intensive program covering Python, JavaScript, SQL, MongoDB, and modern web frameworks.

IBM Cybersecurity Fundamentals - IBM Currently enrolled.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, Dart

Frameworks: Django, Node.js / Express, React / Next.js, Flutter

Databases: MySQL / SQL, PostgreSQL, MongoDB

Cloud & DevOps: Cloudinary, AWS (EC2, S3), Nginx, PM2, Netlify, Supabase

Tools & Protocols: Socket.io (WebSockets), Prisma ORM, JWT / bcrypt, REST APIs, Git/GitHub, Android Studio

Security: RSA/AES Hybrid Encryption, End-to-End Encryption (E2EE), Mobile Security, JWT Auth

Other: Data Visualization, Cybersecurity

FEATURED PROJECTS

C2C Marketplace Platform - *Full-Stack Real-Time Web Application*

- A full-stack consumer-to-consumer marketplace built with a decoupled architecture. It allows users to list items, browse a live feed, and chat in real time without using third-party apps.
- Built a decoupled setup with Next.js 15 frontend on Netlify and Node.js/Express backend on AWS EC2 behind Nginx.
- Added real-time communication with Socket.io, including typing indicators and JWT-authenticated WebSocket connections.
- Designed a PostgreSQL schema for users, products, order interests, and messages using Prisma ORM.
- Secured authentication with bcrypt and JWT, and enabled image uploads to AWS S3.
- Deployed with PM2 for process management and crash recovery.

NivlockX - *Secure Mobile File Storage & Sharing App*

- A mobile app built to explore secure file storage and sharing using hybrid end-to-end encryption.
- Implemented RSA-2048 key exchange and AES-256 file encryption.
- Built in Flutter/Dart for Android, with encryption and decryption handled on-device before network transmission.
- Created an APK for direct download and testing.

AQUAMY - *Chama Management System*

- A full-stack web application for managing a Kenyan community savings group's financial and administrative operations.
- Built a PostgreSQL schema that maps to the group's constitution and tracks members, contributions, loans, meetings, fines, and treasury records.
- Implemented role-based access control for different user roles.
- Integrated M-Pesa Daraja API for contributions, loan repayments, fines, and share purchases.
- Added automatic fine creation, quorum enforcement, and audit trails for sensitive actions.

- Built a member summary model and ledger entries for faster dashboard reads and accurate balance tracking.

COMMUNITY & EXTRACURRICULAR

Google Developer Group (GDG) - University of Embu Chapter

Active member participating in tech talks, workshops, and collaborative learning around software development, cloud tools, and developer workflows.

Nivlek Solutions - Web Development & IT Services

Provide web development, SEO, and technical support services to local clients under the Nivlek Solutions brand.

KEY COMPETENCIES

System Architecture & API Design · Real-Time Systems (WebSockets) · Cloud Deployment (Cloudinary, AWS, Netlify) · End-to-End Encryption · Mobile Development (Flutter/Android) · Database Design (PostgreSQL/MySQL) · Secure Authentication (JWT/bcrypt) · Data Visualization · IT Consultancy
